website

The project follows a simple pathway:
BUILD -> IMPLEMENT -> LEARN

DEGREE: RETHINKING ENTREPRENEURSHIP EDUCATION IN EUROPE

DEGREE is an Erasmus+ project uniting educators, researchers, SMEs, and learners across Europe to create green, future-proof, and digitally innovative entrepreneurship learning experiences.

BUILD - LAYING THE FOUNDATION

DEGREE trains educators and SME experts through hands-on programmes where they design their own entrepreneurship courses. The project also develops impact measurement tools and fosters local and European Communities of Practice to support collaboration and long-term innovation.

IMPLEMENT - TURNING IDEAS INTO ACTION

Trained participants create and deliver real-world entrepreneurship courses that emphasise green, digital, and resilient skills. Learners from higher education, vocational training, and MSMEs engage in authentic learning settings. In the Netherlands,

participants can even earn micro-credentials co-developed with labour market partners.

LEARN - IMPROVING THROUGH INSIGHT

Data from courses is continuously collected and analysed to refine teaching practices. Communities of Practice and cross-country collaborations share what works best and shape recommendations for the future of entrepreneurship education in Europe.

COMMUNICATE - SHARING OUR STORY

DEGREE ensures broad impact through newsletters, website updates, social media outreach, clear branding, and long-term communication strategies.

In short: DEGREE builds stronger, greener, and more innovative entrepreneurship education across Europe, one step at a time.
